EDUCATION

University of Toronto, Toronto, Ontario

Master of Applied Science in Engineering (Research in Computer Vision), 2014 - present
- Thesis: Facial Affective Computing: Emotion Recognition in Human-Robot Interactions

B.A.Sc. in Engineering Science (Aerospace), June 2014
- Thesis: Multi-Robot Machine Learning in Urban Search & Rescue
- Relevant Courses: Algorithms & Data Structures, Database Systems, Artificial Intelligence, Computer Vision, Machine Learning, Scientific Computing, Robotics

RELEVANT EXPERIENCE

Epson Canada, Markham, Ontario

Computer Vision Software Engineer Intern, *R&D* **May 2012 - Aug 2013**
- Analyzed cascade object detection and keypoint matching algorithms in MATLAB to be used in adaptive robotics, improving algorithm pipeline's performance by $> 30\%$
- Developed evaluation software tools in C++ for machine vision algorithm solutions analysis, providing effective feedback of algorithm's performance to research team
- Built frameworks for automating both code-driven and GUI software testing, reducing testing process time by 75%

MDA Corporation, Brampton, Ontario

Autonomy & Controls Lead, *Space Systems Design* **Sept 2013 - Dec 2013**
- Designed a space system for orbital debris removal using top-down design methodology, leading to rigorous system design reviews
- Led team in addressing the command & control aspects of the design, creating control systems and software architectures in accordance to stakeholders' requirements

University of Toronto, Toronto, Ontario

Flight Simulation Research Intern **Summer 2011, Winter 2014**
- Improved upset recovery training for pilots by implementing stall-warning and stall-recognition software onto flight simulator
- Increased RC aircraft maximum flight speed from 15 m/s to 17 m/s, by developing software tools for optimizing aerodynamic, structural, and propulsive performances

Holography Research Intern **Summer 2010**
- Created software for optimizing brightness of full colour digital holograms, increasing brightness in final product by 10%

Autonomous Robotics Design Competition **Winter 2011**
- Designed successful autonomous robot to deploy traffic-cones onto roads with unsafe conditions
- Led team in programming MCU logic, and designing sensor circuits, ranking top 5 in contest

TECHNICAL SKILLS

C/C++ (expert)	Java (expert)	MATLAB/Octave	Git/SVN	SQL
Python	Ruby	Assembly	*nix/Shell	Windows/batch
HTML(5)/CSS	Javascript	jQuery	Android	Prolog
Scripting	Test Automation	OOP	UI Design	LaTeX

INTERESTS

Dragonboat Racing, Gymnastics, Rock Climbing, Painting, AI, Robots, Startups, App Development
